Objective

Aspiring full-stack developer and second-year Computer Science student seeking an internship opportunity to apply backend and frontend development skills. Passionate about backend development and building REST APIs, solving real-world problems, and contributing to dynamic tech teams.

Technical Skills

Languages: Java, C++, JavaScript, HTML5, CSS3, SQL

Frameworks: Spring Boot, React

Databases: PostgreSQL

MVC ArchTools: Git, GitHub, IntelliJ IDEA, VS Code, Postman, Netlify, pgAdmin

Concepts: REST APIs architecture, Responsive Design, OOP, CRUD Operations

Education

Bachelor of Science in ICT

Eden University — Lusaka, Zambia

Expected Graduation: 2028

Projects

Student Management REST API

Spring Boot | PostgreSQL | Java

Built a RESTful API for managing student data, including CRUD operations for students, courses, and registrations.

- Implemented layered architecture using Controllers, Services, and Repositories
- Connected to PostgreSQL using Spring Data JPA
- Handled errors and input validation using DTOs and @Valid
- Tools: Postman, IntelliJ, GitHub
